ABOUT THE
ESOCIETY

Easy-to-use **Registration**, **Members** at a glance, handle **Science**-related content

» eSociety keyfacts
» Easy handling
» Customized user interface
» High availability
» Extensive reporting

Finding a partner who has the experience and the technical knowledge to provide you with solutions and services that fit all your needs is sometimes demanding. We at netkey believe that our solutions and services can contribute positively to our customer's success. eSociety is an all-in-one software with the main aim to deliver more productivity. For most organizations, our software does what it would take three or more separate software purchases to accomplish. Due to its modular architecture eSociety is adaptable to your conference. By selecting between the different components, functionalities and eSociety licences, you will get your own „personal" conference software. With eSociety our customers take advantage of the easy-to-use Registration, a professional Members management, the intuitive handling of Science-related content, clear Statistics and expansible Add-Ons. We know that any event, large or small, puts the image and integrity of your business on display. With eSociety we offer solutions and services which reflect the pride we take in ensuring your complete satisfaction - start to finish.

REGISTRATION

Administration
» Data export ready for your accounting
» Invitation-Letter-Management for international Meetings

Participant Registration
» Online- and Onsite-Registration
» Individual- and Group-Registration
» Supports secure online credit card payment as well as post-payment
» Secured personal area for your participants with confirmation documents, invoices, etc.
» Facility for further services beside the admission ticket (e.g. workshops)
» Different admission tickets for user groups (e.g. member, non-member, student)
» Integrates well with other eSociety solutions, e.g. reduced tickets for society or faculty members

KeyFacts
» Online payments
» Automated badge printing

MEMBERSHIP

Members
» Collect documents from your members during application and/or renewal
» Supports secure online credit card payment as well as post-payment
» Membership directory
» OAuth2 and further APIs to act as identity provider for other services
» Membership-services and API to implement digital beneficial services for your members, like access to e-learning content, e-journals, etc.

KeyFacts
» Secure online credit card payment
» APIs included for using your membership data

EDUCATION REGISTRATION

Indented for a series of hands-on-courses with rather limited places, with a similar fee structure per course.
Supports several series in parallel (e.g. targeted on different experience levels).

Administration
» Run a series of courses with rather limited places throughout the year and keep an overview
» Re-use the fee structure for a series of courses

Attendees
» Overview over running courses
» Keep track of courses visited and upcoming
» Supports secure online credit card payment as well as post-payment
» Waiting list handling in case of fully booked courses
» Documents of your courses: Invoices, Confirmation-of-Attendance as PDF files

KeyFacts
» Badge printing for your hands-on courses
» API included

PERSON

Administration
» All modules use the same master data of the person record – no updates/export-import spreadsheets between systems
» User area with login can be used for self-service on profile data as well as identity provider
» Full export of all relevant data, including membership, registration, ...

KeyFacts
» Record all data you need
» Export

SCIENCE

Abstract Submission
» Separate submission areas, e.g. for public submission and invited speakers
» Full history and representation of the changes made by the user for the abstract body
» Full abstract export in different formats: XML, word processing formats optimized for publishing, meta-data in spreadsheet, ...
» Adaptable rating module, integration of the acceptance-processes
» Adaptable control for the author block
» Integrated support for disclosure information collection
» Related person records are integrated within the system, e.g. registration data, membership, ...
» Extensive submission statistics

Sessions
» Rooms, topics, time-slots – and your ordered list of presentations
» Available via API for re-use on your website, programme planner, and others

KeyFacts

» Known to work with thousands of last-minute-submissions
» Adaptable and flexible rating module
» API access for effective use of your data

INTEGRATES WELL

Interactive Programme Planner: Let your potential visitors get an easy-to-catch insight in your programme with a quick and powerful search, a personal abstract book and personalized calendar abonnements.

EvalBox: Run your congress evaluation down to session, presentation or even speaker and gain valuable insights; integrates well with App vendors

SlideBox: SlideCenter software at its best, with possibility to upload from anywhere (but our solutions integrate with other slide center software as well, of course)

Speaker Counter: Intelligent devices to support your moderators in sticking to the time schedule, so they can more easily care about content and questions

ABOUT NETKEY

After 6 years developing individual software solutions, simplifying everydays work of our customers, finally the company netkey information technology gmbh was founded in 2003, and is since then fully owner-managed.

Since the early beginnings, development of conference registration software was an essential component, but the development expanded to a range of other products around the area of conferences. Common to all products is the easy-to-recognize willingness to take every extra-mile necessary to make the product more valuable to the end-user, which in fact is a relevant part of netkey's success. With long-standing knowledge and know-how netkey has developed a system which meets a large part of the needs of a congress organizer, and lowers the ongoing administrative expenses noticeable.

The purpose of netkey is to create long standing partnerships
